

# Mobile Power Workstation

Take your workstation with you,  
wherever you go.

[www.southgateglobal.com/mpw](http://www.southgateglobal.com/mpw)

Our **Mobile Power Workstation** (MPW) has been specifically designed by our specialist logistics and fulfilment engineering team, allowing operatives to pick, weigh, print, pack, or put away, or audit and update your ERP while safely on the move.

## Walk and work, power through with our MPW

No more walking to and from fixed workstations to weigh, print, pack or photograph with our Mobile Power Workstation. Our MPW enables your operatives to walk and work wherever they are in the warehouse saving time, increasing productivity and improving data entry accuracy in areas across your operation.

- *No more* mis-keyed data or stock-keeping errors from scribbled notes
- *No more* accidents due to operatives carrying laptops or heavy boxes causing slips and trips
- *No more* smashed computers as operatives type data entries on the move

Wherever they are they'll have everything they need with them for easy, safe, accurate data entry, weighing and printing.

## You've got the power – even where you don't

Want to use our MPW as a static workstation where you currently have no power? Simply wheel it into position, lock the wheels and plug your equipment into the power supply or remove it from the cart and place it on a worksurface.

CE and UKCA compliant

**Already have workstations and just need a warehouse-ready mobile power supply?**

Contact our team about a retrofit system.

**We calculate the MPW can save our customers **£5,691 per operative per year** in overall costs giving you an ROI in four months.**

southgate 

## Power up and you're good to go

Delivered fully assembled – just add your computer, printer plus other equipment and you're good to go.

Two interchangeable power packs lasting 16 hours\* each come with every MPW. Your MPW runs two shifts on one pack. Swap in the second pack whilst re-charging the first and it runs 24/7/365.

Four shelves – one fixed, two adjustable at setup and the top shelf adjustable instantly to suit each user's needs.

Push handles and braking wheels for smooth and safe operation right across the warehouse.

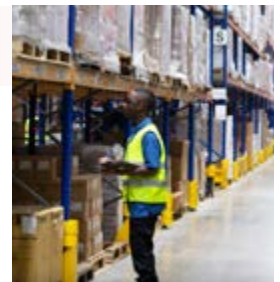

\* The battery will last at least 16 hours on a standard setup (laptop, printer, mouse and webcam) – higher electrical load will vary.

## Get all the benefits of our MPW working for you:

### Increase Efficiency

- Reduce walking to and from the static workstations
- Eliminate mistakes from handwritten notes or incorrect stock data – real time ERP updates via the MPW, live from the pick face
- Ensure operatives can go through their whole shift – and the next – from a single power pack charge

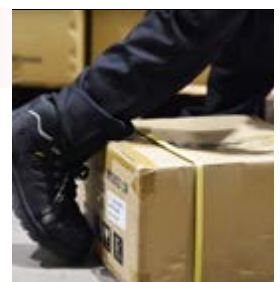

**Estimated Efficiency Saving: £5,241 per operative per year**

### Increase Health and Safety

- No more slip and trip injuries caused by unseen hazards while walking with open laptops
- Reinforces commitment to operative Health & Safety

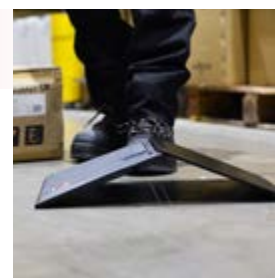

**Estimated Health and Safety Saving: £200 per operative per year**

### Reduce IT Costs

- No more dropped and damaged laptops from one handed data entry!

**Estimated Repair or Replacement Saving: £250 per operative per year**

# The Integrated Mobile Power Supply (MPS)

- 1 Interchangeable power pack (x2 supplied with every MPW)
- 2 DC:DC laptop output
- 3 Variable voltage DC:DC printer output
- 4 USB/USB-C outputs
- 5 Multi-purpose A/C sockets outputs

**Contact us now to see how the MPW can bring dramatic efficiencies and savings to your warehouse.**
