# Providing customisable solutions

Our range of customisable pack bench solutions enable you to maximise the efficiency of your space, streamlining workflow and enhancing productivity.

Our four pack benches have been created to help simplify the process of selecting customised pack benches for your warehouse. Along with the 20 optional extra parts that are available, our pack benches provide flexible solutions.

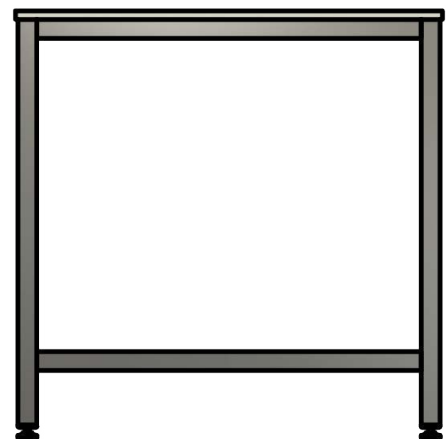

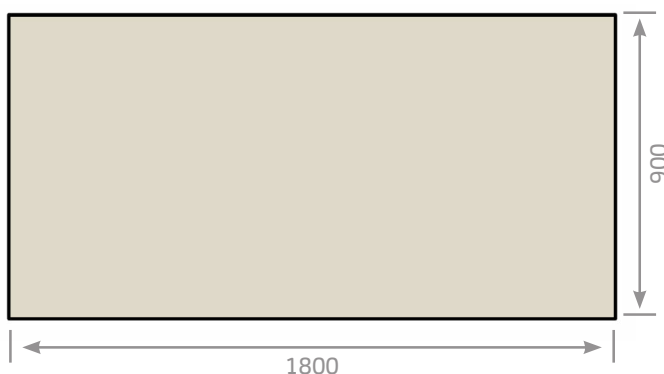

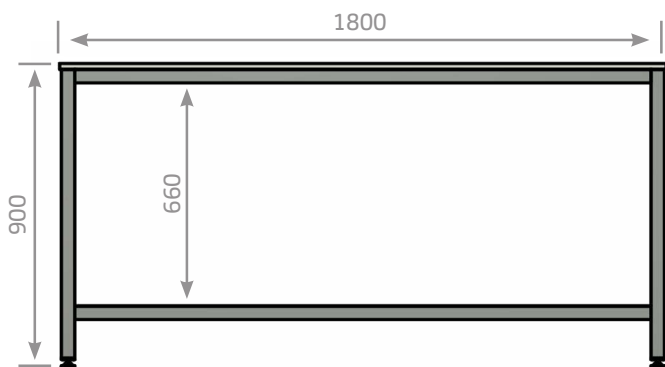

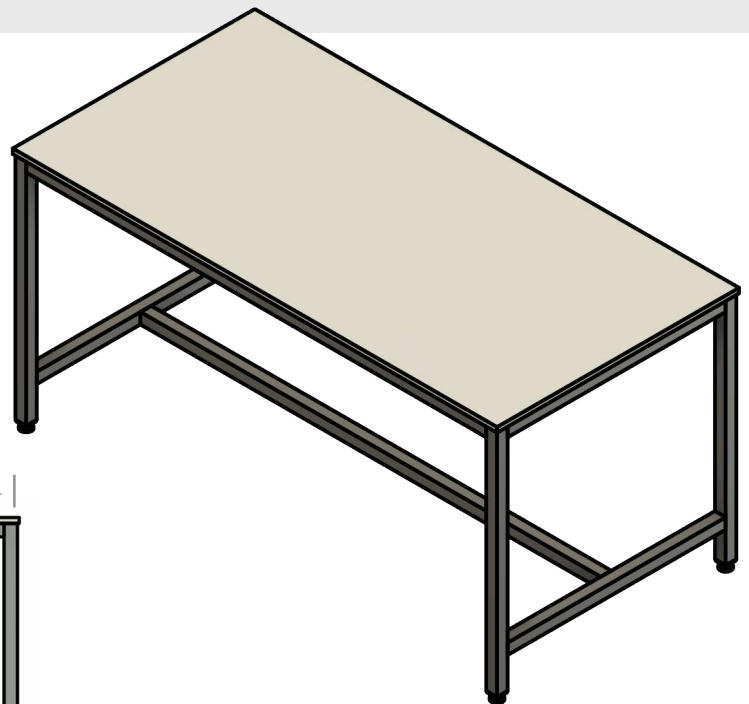

Each bench is built with a 40 x 40mm heavy-duty steel section, fully welded joints and a powder-coated finish to protect against corrosion. They are manufactured to order in Great Britain and have been designed with carefully-selected materials to ensure that they are strong and durable.
